TABLE I-1: SUPPORTED OPERATING SYSTEMS

Installation

. . . .

In the following, installation instructions for the different operating systems are given.

Req.: You have to log onto the respective computer as local administrator, not as domain administrator, because it might not have enough rights. Do not run the installation in silent mode.

Windows

1) Execute the file *myvgl22_?????_win32.exe* (32 bit) or *myvgl22_?????_win64.exe* (64 bit).

2) Follow the instructions in the InstallShield Wizard.

3) Start the software from the Windows Start menu.

Linux

1) Use your preferred .deb package installer to install the package named *myvgl22-?????-ubuntu64.deb* or use the command *sudo dpkg -i myvgl22-?????-ubuntu64.deb* In case that any dependencies problems occur use the *--ignore-depends* command line option.

2) Start the software with the *myvgl* command.

Tips and tricks   If problems with the display of Chinese fonts occur, deinstall the font set fonts-takao-pgothic by using this command: *sudo apt-get remove fonts-takao-pgothic*.
